

Reception Home Learning

We have devised the following approach for Reception that we hope clearly sets out what is expected of your child whilst learning from home. It is intended to allow some flexibility in how you organise your child's time.

It primarily focuses on the core areas of the curriculum (phonics, reading, writing and maths) but will also continue to provide some learning in the other areas of the curriculum as well. The learning that will be provided will be consistent in terms of the content to what is being delivered that week in school but within the limitations of what can be done remotely. It will combine a mixture of online lessons and video tutorials and activities set on learning platforms that we have subscribed to that you can access with the passwords and user names you have been given. All communication and links will be sent via 'Marvellous Me'.

Each week you will be sent the following:

- An overview of the learning sent on Friday for the following week. This will also include the email for the person to contact for all online learning that week.
- A 'Marvellous Me' sent each morning before 9am with the links and activities that your child will need to complete at home for that day.
- A Zoom invite on a Monday morning for a class assembly at 9.15 am
- A Zoom invite on a Friday afternoon for a homework / story sharing session at 2pm.

There is an expectation that pupils complete all online learning and staff will check to see work has been completed. Pupils are expected to complete all work which has been set each day.

Some learning activities and tasks will ask you to photograph and send the work in via email to school.

Finally, we feel that it is important that children at home still feel connected to school and feel a part of our school community. It is therefore really important that your children join the whole class zoom sessions each week. Please if you don't already have 'Zoom' could you download it in preparation. You will also need to talk to your children about protocols and appropriate behaviour online before they join the lessons.

These include:

- Behaviour expected in all video sessions is the same as is expected in school
- Your child being in front of the device 5 minutes before the session is due to begin
- Children should open the meeting link with the support of their parents (Sent via Marvellous Me)
- Children should use their own name so teachers know who they are
- Although children are likely to be excited we ask that they listen carefully to the teacher
- Children should be in a suitable location in their house e.g. not in private areas such as bedrooms
- School uniform is not required but dress should be appropriate
- Anyone appearing in the background should be wearing suitable clothing and refrain from any inappropriate language or behaviour
- If you have any questions about the live sessions or home learning, we ask you not to interrupt the teacher during this time and contact the teacher/school privately.

I hope this outlines clearly what we have put in place and gives clarity as to what the remote learning will look like. We have tried to keep it as simple and accessible as we can. If you have any questions, please don't hesitate to get in touch with either myself or their class teacher.

Thank you for your continued support in these very uncertain and challenging times.
Keep safe and best wishes.

Mrs Simpson
Phase leader for KS1
